

Leadership Intensive™

Focused attention on what matters most.

A single, deep-focus coaching engagement built for a specific moment — when a leader is facing one challenge significant enough to warrant real preparation and real work, but not (yet) an extended coaching engagement. It sits between the exploratory Leadership Strategy Session™ and the longer-form Executive Transition Series™, compressing the depth of a multi-session engagement into a single, highly prepared two-hour meeting.

Leaders walk away with **clarity, confidence, and meaningful forward movement** on the one leadership challenge that matters most right now — backed by two weeks of follow-up support to help it stick.

- A leader preparing for a high-visibility moment — a promotion conversation, board presentation, or new role — where executive presence is in question.
- A leader who feels stuck on one recurring issue and wants a decisive breakthrough rather than an open-ended engagement.
